

YaraLiva®

TROPICOTE®

YaraLiva TROPICOTE			
Total Nitrogen (N)	15.5%	Bulk Density (loose)	1.1 kg/l
Nitrate Nitrogen (NO ₃)	14.4%	Granulometry (2-4mm)	90.0%
Ammonium Nitrogen (NH ₄)	1.1%	Colour	White
Calcium (Ca)	18.8%		

Nitrate nitrogen

Directly available for plant uptake, resulting in fast and predictable growth responses. Non-volatile nor absorbed to soil particles, leaving it directly available to plants. The preferred source for most horticultural and high value agricultural crops. Improves the plant uptake of the cations' potassium, calcium and magnesium.

Readily available calcium

Improves cell wall strength leading to better quality, longer storage life and lifting marketable crop yields.

Proven to reduce blossom end rot in tomatoes, tip burns in lettuce and other leafy vegetables, potato soft rot and water drenched marks in watermelon. Improves soil structure helping to maintain an optimum root development for high yielding crops.

Superior handling

The YaraLiva TROPICOTE prill is specifically designed to allow easy and accurate spreading by machine or hand.

Benefits

- Readily available nitrogen form
- Water soluble calcium
- Easier to handle
- Suitable for spreading by machine or hand
- Dissolves rapidly when in contact with moist soil
- Have minimal caking
- Proven quality
